INSTRUCTION MANUAL

RODENT 824-20 FREEDOM BREEDER

Product Description

This rack is made of 304 Stainless Steel, no rust ever!

The Rodent 824-20 rack was initially designed to be used for small grow out rat colonies. If you want to organize your rodents this rack is an awesome fit for you. This rack is also great for African soft furs, hamsters, or rats if you want to give your breeding colonies a little extra room.

This rack is also perfect for a Freedom Breeder Rack systematic rodent breeding style. The Cycle begins once your mothers are pregnant, you use our Rodent 1050 to put your pulled moms to give birth and nurse their pinkies to weaned, away from other females and males. The next step is to move them to this rack (Rodent 824-20) with their mothers to raise them to smalls.

Caution

Channels and backstops have sharp edges, take precautions.

INSTRUCTION MANUAL

RODENT 824-20 FREEDOM BREEDER

Assembly

STEP 1. Unwrapping

The Rodent 824-20 is packed in a cardboard carton and plastic wrap for protection during shipment. Carefully unpack the items and remove the pallet.

Notice that the Rodent 824-20 is almost assembled.

Note: If you detect any issue or damage at the moment of the delivery please contact us before you accept the shipment.

STEP 2. Parts

Count all parts to make sure nothing is missing.

See Packing list for Descriptions and Quantities.

PART #	DESCRIPTION	QTY
1	Rodent 824-20 Stainless Steel Levels	8
2	FB20 Semi Clear Tubs	24
3	Water System	1
4	Stainless Steel Removable Inserts	24
5	Base Frame	1
6	4" Heavy Duty Casters (Screws and Bolts Included)	4

FREEDOM BREEDER

Assembly

STEP 3. Casters

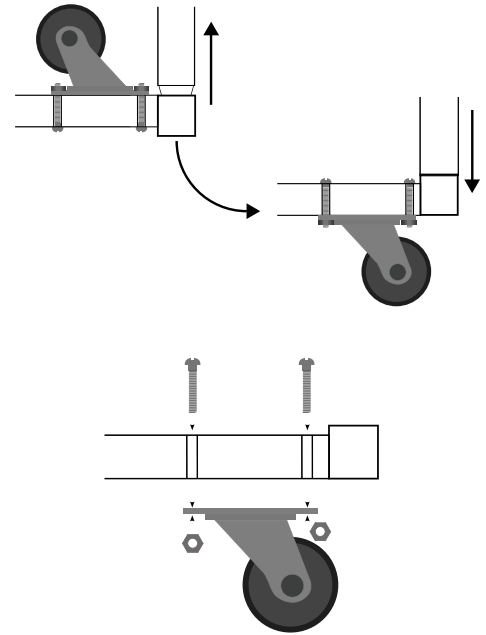

Notice that the rack may or may not had the casters installed.

In case they have been installed, you just need to turn upside down the frame with the casters to the correct position.

In case the casters are not installed:

- 1.- Find the casters, nuts, and bolts.
- 2.- Insert the bolts into the holes in the lower frame.
- 3.- Using the ratchet and the 1/2" socket, tighten the caster with the bolts on each corner of the frame until the bolts are flush to the tubing of the frame.

Note: Make sure to put all the nuts and bolts included (3 per caster) and not overtighten the nuts.

STEP 4. Stacking the levels

Stacked the levels over the base frame with the casters installed. You don't have to use tools on this step.

Assembly

STEP 5. Trays

Insert the trays thru the channels on each level.

STEP 6. Water system

Find the extra tube included to connect the water lines already installed.

Depending on your choice, you can use a Pressure regulator or a Gravity system.

For the **Gravity system**, put the bucket on top of your rack and let the gravity distribute the water into the water lines.

In the case of using a **Pressure regulator**, connect the water lines into the main pipe previously connected to the pressure regulator.

Continue to step 7

FREEDOM BREEDER

Assembly

STEP 7. Water system cover (If bought)

Place the leg covers to the frames taking care of leaving enough space for the water tube.

STEP 8. Water system test

1. Please run water through your new racking systems for a day before placing rodents or bedding in the rack.
2. Check for any disconnected tubing.
3. Adjust valves by hand to stop any leak and test again for another day. (Do not tighten with tools!)

This test is to avoid flooding your rodents.
